

New Moon in Pisces

The New Moon in Pisces encourages us to expand the way we use our dreams, intuition, and spiritual practices in our daily lives. Our imaginations are especially strong on this New Moon and it will be easier to envision a reality in which we are doing and being exactly what we were meant to do and be. We can use the following spread to explore how our dreams, intuition, and spiritual practices can help us see that everything that is happening right now in our lives is happening **for** us rather than **to** us. What would our ideal lives look and feel like if we allowed ourselves to dream bigger, follow our intuition, and have more faith in ourselves and the universe?

Dreams

1. What is my biggest dream right now?
2. What challenges keep me from pursuing this dream?
3. What creative solutions will help me the most at this time?

Intuition

1. What is my intuition trying to tell me?
2. Why am I avoiding hearing this message?
3. What will happen if I follow to my intuition in this matter?

Spiritual Practices

1. What does the universe want me to know?
2. How are my current spiritual practices serving me?
3. In what ways can I strengthen my spiritual practices in order to deepen my faith in myself?
